

Professor Athole Marshall, Prifysgol Aberystwyth University

Mae'r Athro Athole Marshall yn arwain y grwp bridio planhigion yn IBERS, Prifysgol Aberystwyth. Ei faes ymchwil penodol yw integreiddiad technolegau ffenoteipio a moleciwlaid mewn rhaglenni bridio. Mae'n arwain sawl prosiect amlddisgyblaethol ar borfwyd a chodlys, codlys grawn a cheirch sydd wedi'u hariannu gan Innovate UK a BBSRC ac mae wedi datblygu cysylltiadau eang gyda'r diwydiant.

Professor Athole Marshall leads the plant breeding group at IBERS, Aberystwyth University. His specific areas of research is the integration of new phenotyping and molecular technologies into plant breeding programmes. He leads multi disciplinary projects on forage grasses and legumes, grain legumes and oats funded by Innovate UK and BBSRC and has developed extensive links with industry.
